Intelligent all-wheel-drive (AWD)

Kuga senses and reacts to every change instantly, whether you are driving on or off-road. Its intelligent system, using proven all-terrain technology, analyses driving conditions and automatically decides how much power each wheel needs to suit every surface. The result is best-in-class on-road performance and handling, plus impressive off-road capability. As Kuga adds more power to the rear wheels only when needed, it saves fuel and reduces impact on the environment.
